Avalanche Danger

With lots of new snow available for transport in the southern Gallatin mountains, today's strong winds will continue to load lee facing slopes and the avalanche danger in the southern Madison and southern Gallatin Ranges, the Lionshead area near West Yellowstone, the mountains around Cooke City, and the Washburn Range, remains CONSIDERABLE on wind-loaded slopes steeper than 35 degrees. Wind-loaded slopes that are less steep, and all non-wind-loaded slopes have a MODERATE danger.
